## 3 Discussion

- Vote on opening up the validation repository  
No objections - repository can be made public
- review and input for Description of Work  
The description is being updated. Your contributions and comments are expected.  
<https://github.com/openETCS/validation/tree/master/DescriptionOfWork>

Filling backlog for verification and validation functionalities is ongoing. Current discussions:

- The reference that should be used for the test tool.
- How should the test cases be generated.
- Itea Presentations: Planning and preparation started.
