2   Agenda

- Management of openETCS publications and glossary

3   Discussion

- Zotero (available as stand-alone application and browser plugin) will be considered as a tool for the management of publications. A Wiki page describing the use of Zotero will be set up by Stefan Rieger.

- It was proposed to put all openETCS publications on github. Maybe publications who must not be made available to the public due to copyright reasons will be put on sharepoint or a private repository.
